

**CPE 2006  
SCIENCE**

## SECTION A

### Question 1 (20 marks)

For each item, there is **ONE** correct answer. Draw a circle around the letter which shows the correct answer.

Example: A bird which has become extinct in Mauritius is the

- A cardinal.
- B pink pigeon.
- ☒ C dodo.
- D Mauritius parakeet.

---

1. To make **concrete** we need cement, water and

- A salt.
- B sand.
- C sugar.
- D soil.

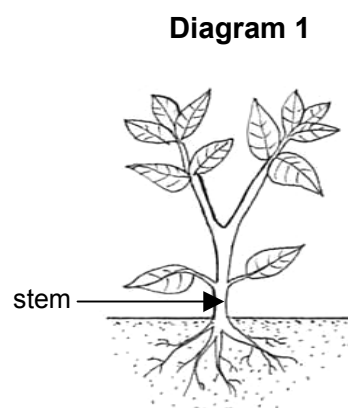

2. Which of these materials is produced by an animal?

- A cotton.
- B rubber.
- C silk.
- D nylon.

3. **Diagram 1** shows a plant.

One function of the stem is to

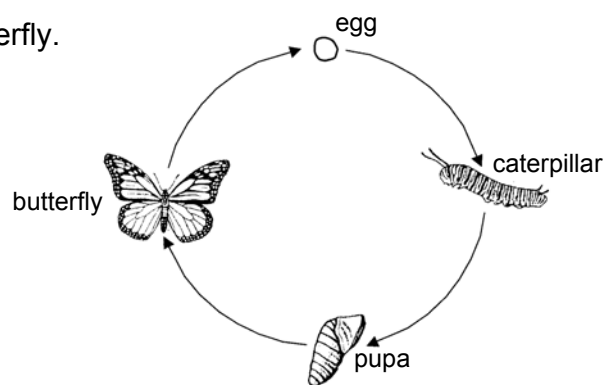

- A absorb water from the soil.
- B hold the plant in the soil.
- C carry food to other parts of the plant.
- D produce fruits and seeds.

4. **Diagram 2** shows the life cycle of a butterfly.

Which **one feeds** on leaves?

- A** Egg
- B** Caterpillar
- C** Pupa
- D** Butterfly

5. **One** source of energy which causes pollution is

- A** falling water.
- B** the wind.
- C** the sun.
- D** firewood.

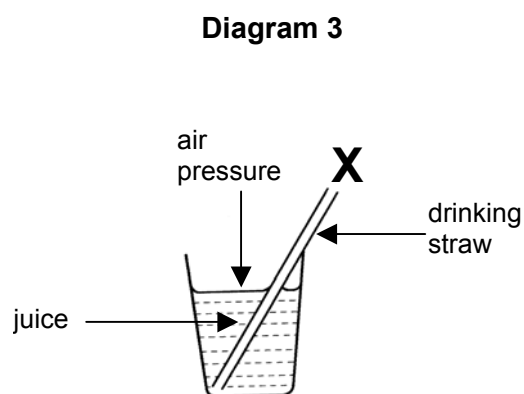

6. **One** way to protect people against infectious diseases is by

- A** contamination.
- B** condensation.
- C** purification.
- D** vaccination.

7. Study **Diagram 3**.

When air is sucked out from **X**, air pressure

- A** makes the juice evaporate.
- B** causes the juice to freeze.
- C** pushes the juice up the straw.
- D** makes the juice condense.

8. Which of these is burnt to produce electricity?

- A Bagasse
- B Fertiliser
- C Molasses
- D Scum

9. Study **Diagram 4**.

**Diagram 4**

The baby is holding an object made of glass.  
This is **dangerous** because glass

- A is flexible.
- B is waterproof.
- C breaks easily.
- D melts easily.

10. Water becomes safe for drinking after chlorination.

Chlorine is added to drinking water to

- A kill germs.
- B remove mud.
- C remove pesticides.
- D kill insects.

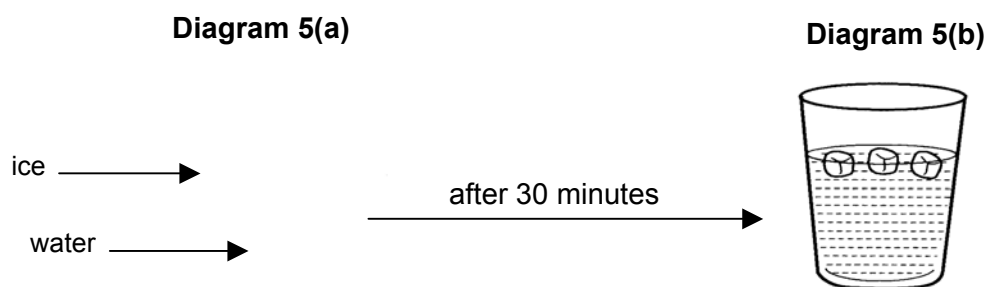

### Question 2A (20 marks)

1. Complete the sentences with the correct word or words:

**gills      fins      eyes      oxygen      scales      carbon dioxide**

- (a) Fish give out ..... and take in ..... .
- (b) Fish have ..... to swim and ..... to breathe.
- (c) Fish have ..... all over their body.
2. (a) Why is fish a good food for children to eat? Give **one** reason.
- .....
- (b) Give **one** way of preserving fish.

3. **Diagram 5(a)** shows a glass of water with ice cubes.

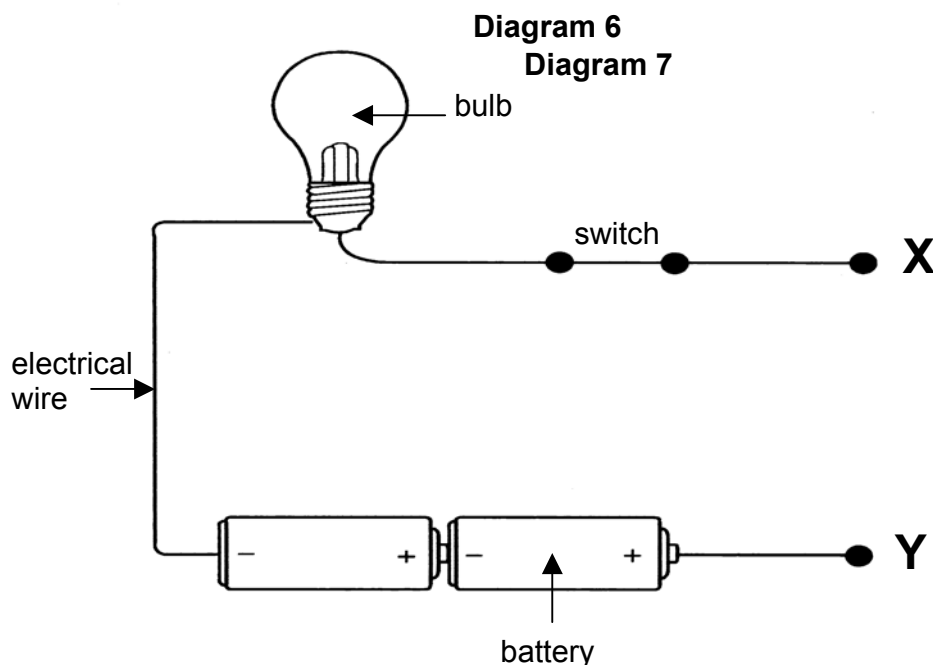

- (a) Which **two states** of water are shown in **diagram 5(a)**?
- (i) The ..... state (ii) The ..... state.

**Diagram 5(b)** shows the same glass of water after 30 minutes.

- (b) Explain what has happened to the ice. ....

## Question 2B (20 marks)

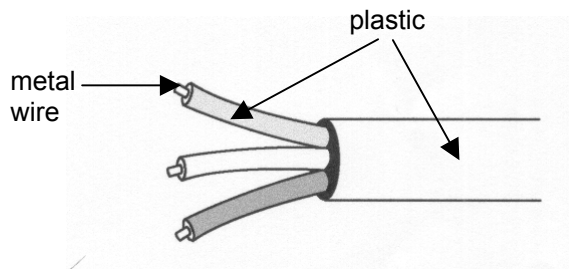

**Diagram 6** shows an incomplete electric circuit.

1. Complete the sentences with the correct word from **diagram 6**.
  - (a) The source of **electrical** energy is the .....
  - (b) **Light** energy is produced by the .....
2. The bulb lights when a ..... **copper wire** ..... is placed across **X** and **Y**.
  - (a) Give **two** other **materials** that will cause the bulb to light when placed across **X** and **Y**.
    - (i) .....
    - (ii) .....
  - (b) Give **two materials** that will **not** cause the bulb to light when placed across **X** and **Y**.

3. (i) ..... (ii) .....  
**Diagram 7** shows an electrical wire.

**Diagram 7**

Why is the metal wire covered with plastic?

.....

.....

4. **Diagrams 8 (a) and 8 (b)** show two sets of teeth in the lower jaw.

**Diagram 8 (a)**

**Diagram 8 (b)**

- (a) Study **diagram 8(a)**.

It shows a set of teeth called ..... teeth.

- (b) Study **diagram 8(b)**.

How many teeth should an adult person have in **both jaws**? .....

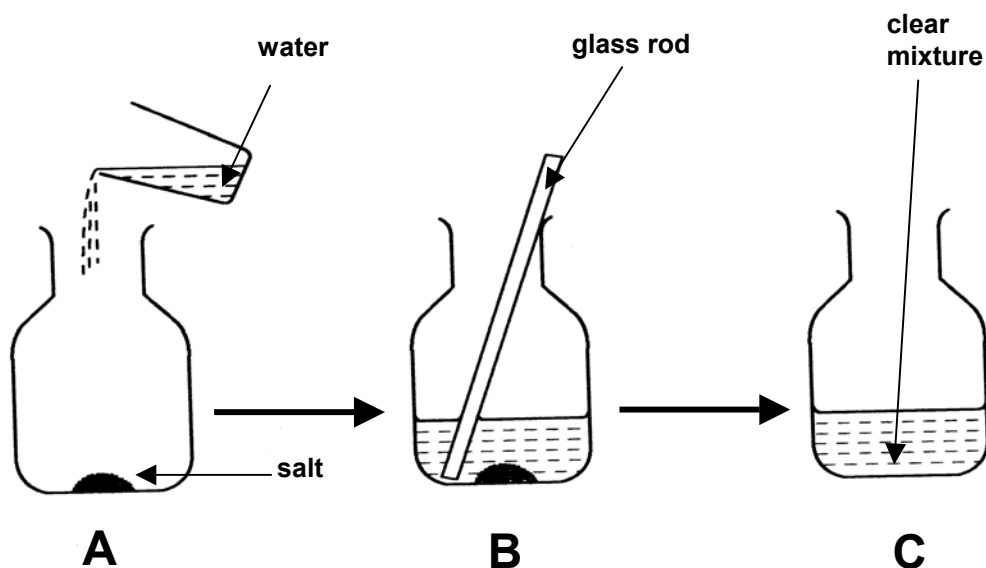

- (c) Tooth decay can result in .....

## SECTION B

### Question 3 (20 marks)

1. Study **diagram 9** and answer the questions which follow.

**Diagram 9**

In **A**, water is added to salt in a glass jar.

- (a) In **B**, the water and salt are stirred with a glass rod.

Name the solvent in **B**. .....

- (b) In **C**, the liquid is a clear mixture. You can no longer see the salt.

Explain what has happened to the salt.

.....

- (c) Explain how you could get the salt back again.

.....

.....

(d) The solid in **A** is salt.

(i) Name **one other** solid that will form a clear mixture with water.

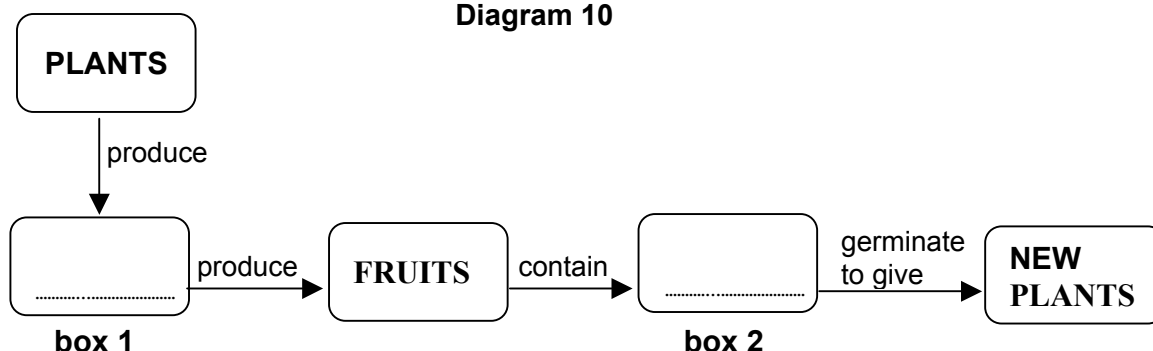

.....

(ii) Name **one** solid that will **not** form a clear mixture with water.

.....

2. Study **diagram 10** which shows different stages of how plants reproduce.

**Diagram 10**

(a) The missing word in **box 1** is .....

(b) The missing word in **box 2** is .....

(c) Pollination is necessary for plants to produce fruits.

(i) What is pollination?

.....  
 .....

(ii) Name **one** animal that helps in pollination.

.....

(d) Give **one** reason why some endemic plants have become rare in Mauritius and Rodrigues.

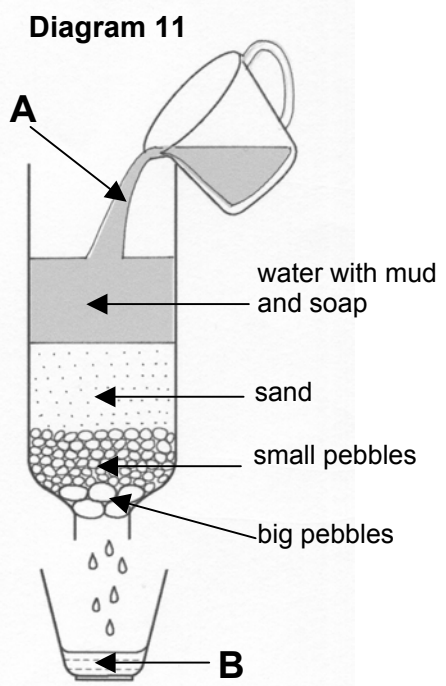

.....  
 .....

Question 4 (20 marks)

1. **Diagram 11** shows filtration of water.

(a) Write **Yes** or **No** to complete **table 1**.

| Table 1       |            |            |
|---------------|------------|------------|
|               | Water at A | Water at B |
| contains mud  | Yes        |            |
| contains soap | Yes        |            |

(b) Give **one** way in which polluted water is harmful

(i) to people : .....

.....

(ii) to the environment : .....

.....

(c) Factories sometimes pollute the environment.  
Give **two** ways in which factories can reduce the pollution they cause.

(i) .....

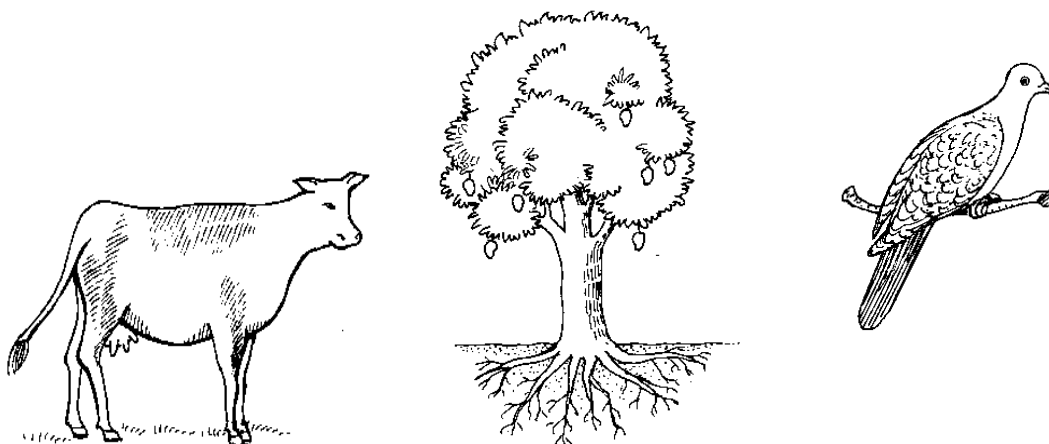

.....

(ii) .....

.....

2. **Diagram 12** shows **three** living things.

**Diagram 12**

**cow**

**plant**

**bird**

- (a) The cow, the plant and the bird **feed themselves** and **reproduce**.

Give **one other** similarity between the cow, the plant and the bird.

.....

- (b) The bird **lays eggs** but the cow **gives birth to its young**.

Give **one other** difference between the bird and the cow.

.....

.....

- (c) Plants make their food by photosynthesis. Explain how they do this.

.....

.....

.....

.....
