

SECTION A

Question 1 (20 marks)

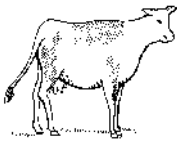

For each item, there is **ONE** correct answer. Draw a circle around the letter which shows the correct answer.

Example: Which **one** of the following is an insect?

- A** Butterfly
- B** Dog
- C** Lizard
- D** Pigeon

1. Which **one** of the animals in **Diagram 1** produces wool?

Diagram 1

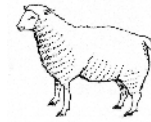

Cow

Deer

Dog

Sheep

- A** Cow
 - B** Deer
 - C** Dog
 - D** Sheep
2. Which **one** of the following materials is man-made?
- A** Sand
 - B** Wood
 - C** Plastic
 - D** Rock
3. Which type of food do herbivores feed on?
- A** Plants
 - B** Animals
 - C** Insects
 - D** Plants and animals

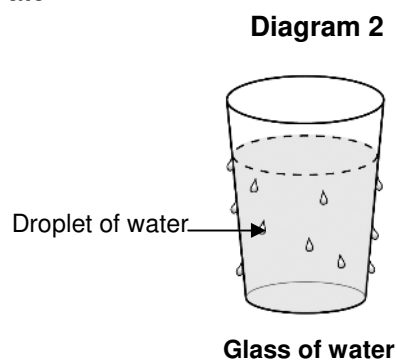

4. Which **one** is a common cause of tooth decay?

- A Going to the dentist regularly
- B Brushing teeth regularly
- C Using toothpaste to clean teeth
- D Microbes growing on food left on teeth

5. **Diagram 2** shows a glass containing **very cold** water.

Which process causes droplets of water to form outside of the glass?

- A Condensation
- B Evaporation
- C Freezing
- D Melting

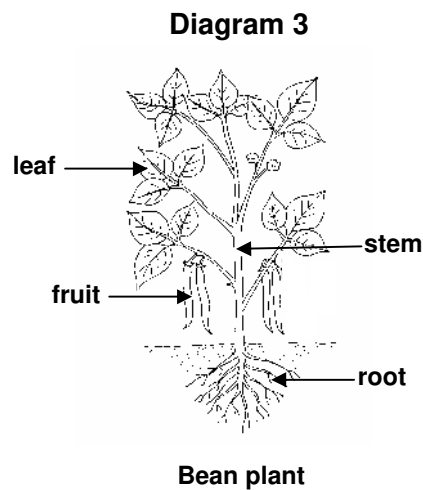

6. Which **one** is a **disadvantage** of electricity?

- A It can be transformed into light energy
- B It can cause electric shock
- C It can be transformed into sound energy
- D It can be transmitted over long distances

7. **Diagram 3** shows a bean plant.

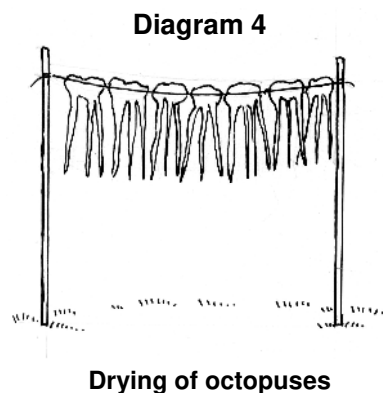

Which part of the plant holds it in the soil?

- A Leaf
- B Root
- C Fruit
- D Stem

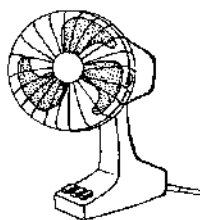

8. **Diagram 4** shows the drying of octopuses.
What do the octopuses lose during drying?

- A** Air
- B** Salt
- C** Sugar
- D** Water

9. From where do fish obtain **oxygen** for breathing?
- A** Air dissolved in water
 - B** Air above water
 - C** Salts dissolved in water
 - D** Animals in water
10. **Diagram 5** shows an **electric** fan.

Diagram 5

Electric fan

Which energy change occurs in the fan?

- A** Electrical energy to chemical energy
- B** Light energy to electrical energy
- C** Electrical energy to movement energy
- D** Light energy to chemical energy

Question 2A (20 marks)

1. Complete the sentences (a) to (d) using the correct word or words from the list below.

air filter air pump barometer telescope thermometer

- (a) An instrument used to measure air pressure is the
- (b) An instrument used to inflate car tyres is the
- (c) An instrument used to measure air temperature is the
- (d) In a factory, air pollution can be reduced by using the

2. **Diagram 6** shows an inverted 'empty' bottle held in water.

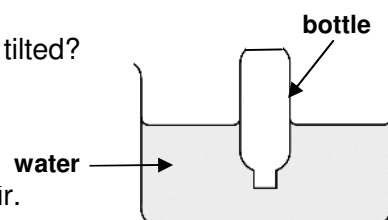

Diagram 6

- (a) What is seen coming out from the bottle when it is tilted?

.....

- (b) Give a common property of pure water and pure air.

.....

3. Complete the sentences given below.

- (a) We **cannot** see through wood because it is
- (b) Materials that allow only some light to pass through are called materials.

4. Draw a line to match phrases (a) and (b) to the correct word.

Phrases

- (a) A substance which has a fixed shape is a
- (b) A substance formed when water evaporates is a

Words

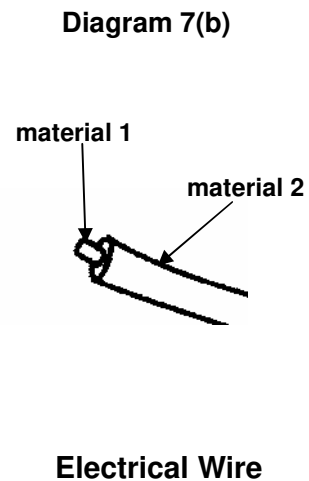

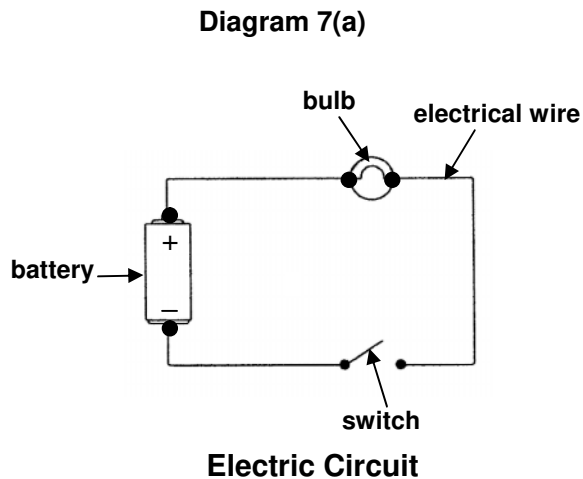

gas

liquid

solid

Question 2B (20 marks)

1. **Diagram 7(a)** shows an electric circuit. **Diagram 7(b)** shows an electrical wire made up of **materials 1** and **2**.

- (a) Study **Diagram 7(a)** and complete the following sentences.

- (i) The source of electrical energy in the circuit is the
- (ii) A switch is used in an electric circuit to
-

- (b) Study the electrical wire in **Diagram 7(b)** and complete **Table 1**.

Table 1

Materials in Diagram 7(b)	One example of the material	One useful property of the material in an electrical wire
material 1		
material 2		

2. **Diagram 8** shows a broken glass bottle.

Diagram 8

Broken glass bottle

- (a) Give **one** reason why this broken glass bottle is dangerous.

.....

- (b) Name a **solid** raw material used to make glass.

.....

3. Eating balanced meals helps to keep us healthy.

Give **two other** ways which help us to remain in good health.

- (a)

.....

- (b)

.....

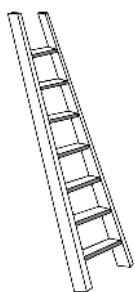

SECTION B

Question 3 (20 marks)

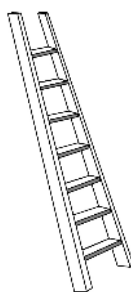

1. **Diagram 9** shows **three** ladders made of **different** materials.

All the ladders are of the same size.

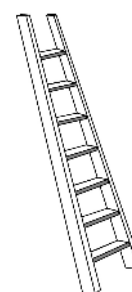

Diagram 9

aluminium

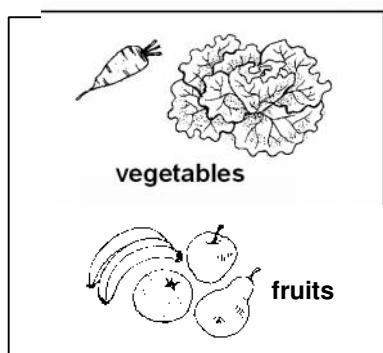

iron

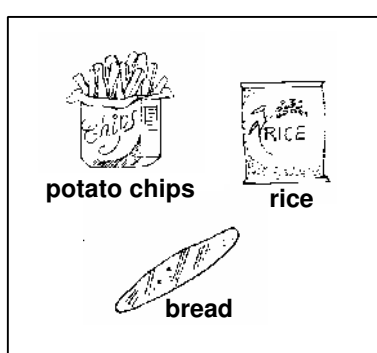

wood

- (a) Which **one** of the **metal** ladders is heavier?
- (b) Which **one** of the **materials** in **Diagram 9** is obtained from a living thing?
.....
2. **Diagram 10** shows **three** groups of food: **A**, **B** and **C**.

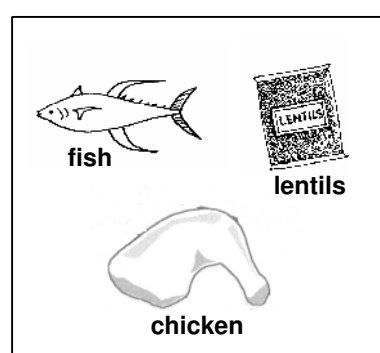

Diagram 10

Group A

Group B

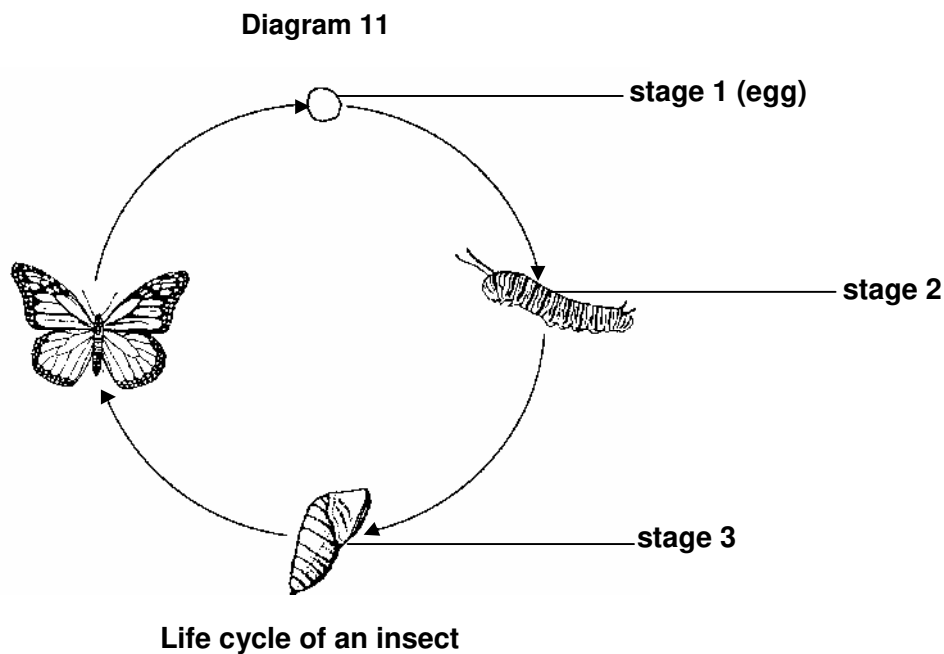

Group C

- (a) Which group shows **food for growth**?
- (b) Which group shows **food for health**?

3. **Diagram 11** shows the life cycle of an insect.

Stage 1 shows the **egg**.

Name the **stages 2** and **3** in **Diagram 11**.

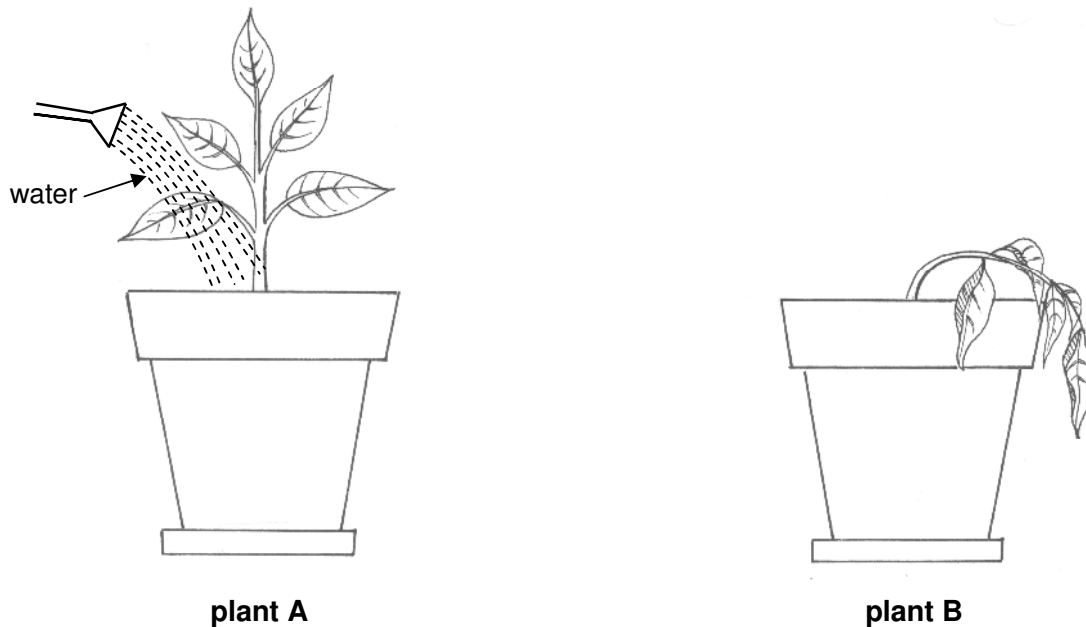

- (a) **Stage 2** shows the
- (b) **Stage 3** shows the
4. Give **two** types of pollution caused by motor vehicles.
- (a)
- (b)
5. (a) Give **one** example of a non-renewable source of energy.
-
- (b) Give **one** use of energy obtained from falling water.
-

Question 4 (20 marks)

1. **Diagram 12** shows one condition for a plant to grow.

Study **Diagram 12** and answer the questions below.

Diagram 12

- (a) Explain what has happened to **plant B**.

.....

.....

- (b) Give **another** condition that plants need to grow well.

.....

2. **Complete the sentence below.**

Plants exchange gases through the in their leaves.

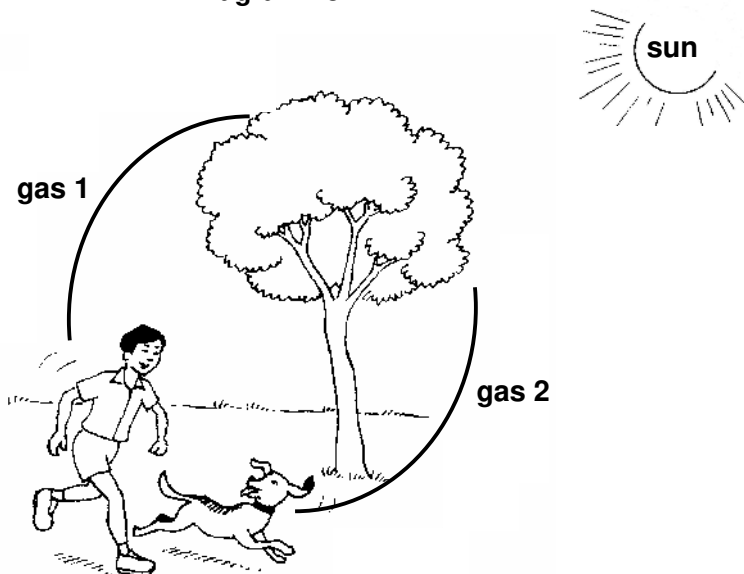

3. Fill in the blank spaces in **Table 2**. One example is given.

Table 2

Animal	Group	One characteristic of the group
sparrow	bird	It has feathers.
crocodile		
cat		

4. **Diagram 13** shows the **air cycle** during the day.

Diagram 13

- (a) Name **gas 1** and **gas 2**.

(i) **gas 1**: (ii) **gas 2**:

- (b) Explain how this cycle maintains the composition of air during the day.

.....

.....
