

**Time: 1 hour**

SECTION A

Question 1 (20 marks)

For each item, there is **ONE** correct answer. Draw a circle around the letter which shows the correct answer.

Example: Which **one** of the following is an insect?

- A Pigeon
- B Bat
- ☒ C Butterfly
- D Sparrow

1. Which one of the following is an extinct bird from **Rodrigues**?

- A Dodo
- B Solitaire
- C Sparrow
- D Kestrel

2. Which one of the following food items would a **herbivorous** animal eat?

- A Meat
- B Eggs
- C Leaves
- D Fish

3. **Diagram 1** shows the water cycle.

Through which one of the following processes does water vapour turn into rain?

- A Evaporation
- B Melting
- C Condensation
- D Freezing

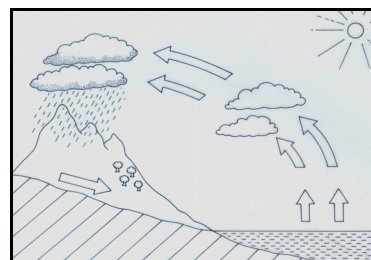

Diagram 1 : Water Cycle

4. Which of the following conditions is **necessary** for coral polyps to grow?
- A** Deep and cold seawater
 - B** Shallow and warm seawater
 - C** Shallow, warm and fresh water
 - D** Deep, cold and fresh water
5. **Diagram 2** shows an electric circuit with two metal clips, **A** and **B**.

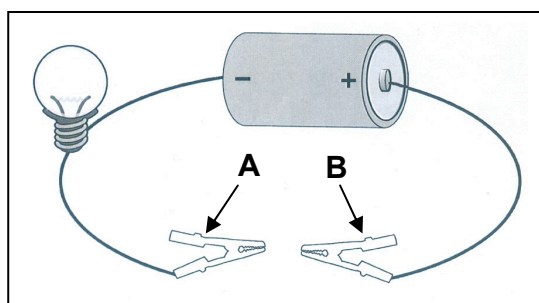

Diagram 2 : Electric Circuit

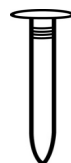

Which **one** of the following materials, when placed between metal clips **A** and **B**, will allow the flow of electricity in the circuit?

A Plastic peg

B Wooden spoon

C Iron nail

D Rubber band

6. Which one of the following is the **source** of energy in an electric circuit?
- A** Dry cell
 - B** Electric wire
 - C** Bulb
 - D** Switch

7. In which one of the following is **chemical energy** converted into **electrical energy**?
- A** Movement of wind in a wind turbine
 - B** Falling water in a hydroelectric power station
 - C** Capturing of light by solar panels
 - D** Burning of bagasse in a sugar factory
8. Which one of the following will form a **clear** solution when mixed with water?
- A** Salt
 - B** Sand
 - C** Soil
 - D** Flour
9. Animals have different habitats. What is a habitat?
- A** The way animals move from one place to another
 - B** The way animals feed their young
 - C** The food which animals eat
 - D** The place where animals live
10. Which one of the following food items will cause obesity if eaten in excess?
- A** Beans
 - B** Cabbage
 - C** Apples
 - D** Rice

Question 2A (20 marks)

1. Fill in the blanks in sentences (a) to (d), using the correct word from the given list.

feathers endemic fur gills exotic

- (a) Birds which are **unique** to Mauritius are called birds.
- (b) The of fish help them to breathe in water.
- (c) The of the dog protects it against cold weather.
- (d) Cats are examples of animals which have been introduced on our island.

2. (a) Give **one** importance of hens to humans.

.....

(b) Give **one** way how rare birds are protected in Mauritius.

.....

.....

3. Match the materials in Column **A** to their corresponding properties in Column **B**.

Column A: Material
Iron
Rubber
Glass
Cotton

Column B: Property
Absorbs water and sweat
Rusts when exposed to air and water
Absorbs shock and is elastic
Is transparent

Question 2B (20 marks)

1. Complete the table below.

Material	Material obtained from	Use
Leather		
.....	Sheep	
.....		To make aeroplanes

2. **Diagram 3** shows a boy burning leaf litter from his garden.

Diagram 3

(a) Which gas is needed for this fire to burn?

.....

- (b) The fire is giving out smoke. Explain how this form of air pollution affects plants.

.....

.....

- (c) Give **one** way how the boy can extinguish this fire.

.....

.....

- (d) Instead of burning the garbage, what beneficial use could the boy make of it?

.....

.....

SECTION B

Question 3 (20 marks)

1. (a) A green potted plant which is regularly watered is placed in a dark room.

(i) Give **one** factor which is **absent** from the room, thus preventing the plant from making its own food.

.....

(ii) Which gas is **given out** by this plant when it is in the dark?

.....

(b) Give **one** condition which is necessary for a seed to transform into a new plant.

.....

(c) Give **one** reason why plants are important to animals.

.....

.....

(d) Explain how plants help to prevent soil erosion.

.....

.....

2. (a) Carnivores need to have strong canines. Explain why.

.....

.....

- (b) Give **one** reason why human babies who are aged less than 8 months do not need to have molars.

.....

.....

- (c) Give **one** precaution you must take to protect your teeth from decay.

.....

.....

3. (a) Write down **three** food items which will make a balanced meal.

(i)

(ii)

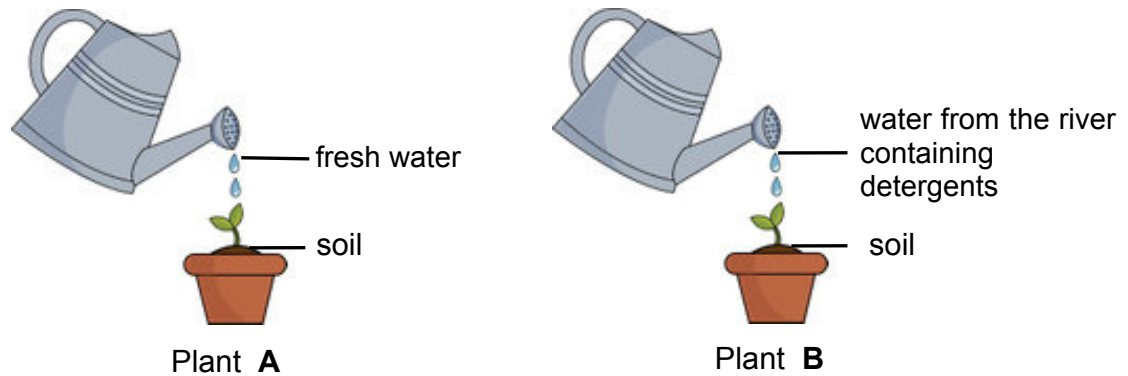

(iii)

- (b) Give **one** reason why we must store food at a low temperature in a refrigerator.

.....

Question 4 (20 marks)

1. Study **Diagram 4** which shows an experiment with two potted plants. Plant **A** is watered regularly using fresh water. Plant **B** is watered regularly using water from a river containing detergents. Both plants are placed outside in the garden.

- (a) What is this experiment testing?

.....

.....

- (b) What will happen to Plant **A** and Plant **B** after a few weeks under the same conditions as at the beginning of the experiment?

Plant **A** :

Plant **B** :

- (c) Give one way how polluted water can be **purified**.

.....

.....

2. The authorities in Rodrigues have prevented the use of plastic bags on the island.

- (a) Give **one** way how plastic bags harmed the environment in Rodrigues.

.....

.....

- (b) Plastic is manufactured from oil obtained from fossil fuels. The use of fossil fuels is partly responsible for Global Warming on Earth.

Explain how the use of fossil fuels contributes to Global Warming.

.....

.....

- (c) Give **one** way how the consequences of Global Warming affect people's lives.

.....

.....

3. **Diagram 5** shows a solar farm.

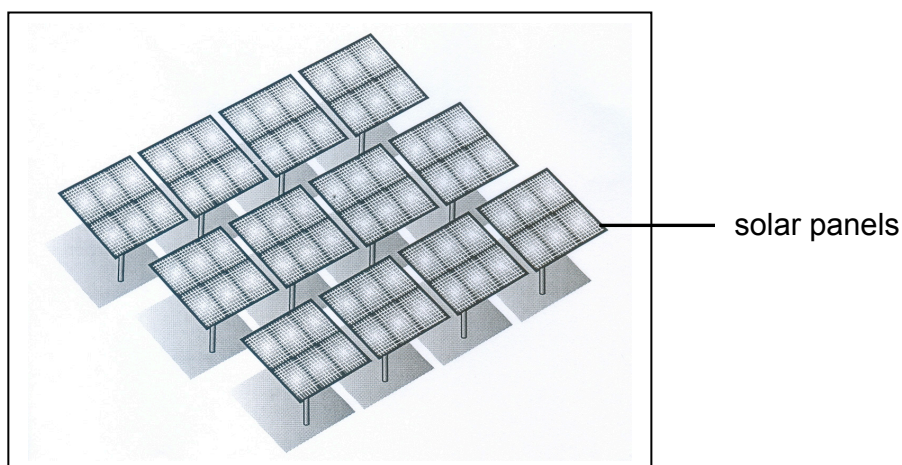

Diagram 5 : Solar farm

- (a) Explain why it is better to use light from the sun rather than fossil fuels to produce energy.

.....

.....

- (b) Explain what is the difference between a renewable and a non-renewable source of energy.

.....

.....

- (c) Although **charcoal** is a renewable source of energy, it is **not** commonly used. Explain why.

.....

.....
