

PSAC Science Specimen Paper 2026

SN	TOPIC	QUESTION No.	LEARNIG OBJECTIVE (LO)	ASSESSMENT OBJECTIVES			TOTAL MARKS
				AO1	AO2	AO3	
1	Animals	1(a)	Identify different types of animals	1			15
		1(b)	Name some of endangered animals in Mauritius and Rodrigues	1			
		1(h)	demonstrate understanding of a balanced diet		1		
		6(a)	Classify animals according to the type of food they eat	2	2		
		6(b)	Compare the milk and permanent teeth	2			
		6(c)	State measures to protect endangered animals		2		
		6(d)	Demonstrate understanding of the need to protect, preserve and restore habitats of animals		1		
		6(e)(i)	Inquiry skills & Processes - Receiving and transmitting information orally, in writing or by drawing pictures, tables and models			2	
		6(e)(ii)				1	
2	Plants	1(e)	Compare and classify plants by looking at their different parts	1			14
		1(f)	Investigate that one of the main function of the root and stem is to transport water and minerals			1	
		4(a)(iii)	Demonstrate understanding of how plants make their food by photosynthesis	1			
		7(a)	Demonstrate appreciation that most plants live in habitats that are suitable for them	6			
		7(b)	State how plants make their food	1			
		7(c)(i)	Investigate the conditions for plants to grow well and communicate findings			1	
		7(c)(ii)				1	
		7(d)	State the conditions for plants to make their food.	2			
3	Energy	2(a)	Recognise polluting/non-polluting, renewable/non-renewable sources of energy	3			10
		2(b)	Explain energy transformation in common devices		4		
		10(d)			3		
		10(a)(i)	Identify, list and draw components that can make a complete circuit	2			

4	The Simple Electric Circuit	10(a)(ii)	Demonstrate understanding of how electricity flows in a complete circuit		1		7
		10(b)(i)	Investigate the simple electric circuit and communicate findings		2		
		10(b)(ii)			1		
		10(c)	Describe the safe use of electricity at home and at school		1		
5	Water	3(a)(i)	Demonstrate an understanding of the different steps of the water cycle	1			12
		3(a)(ii)		2			
		3(b)	Show an understanding of melting, freezing, evaporation and condensation as changes of states		2		
		3(c)	-Recognise interchangeable states of water	1	1		
			-Compare hydro and thermal power stations	1			
		3(d)	Explore how salt is obtained from seawater by evaporation			1	
		3(e)(i)	Inquiry skills & Processes - Selecting and handling simple apparatus for various tasks			1	
		3(e)(ii)	Inquiry skills & Processes - Explaining observations or data and drawing conclusions from simple investigations			1	
6	Air	3(e)(iii)	Inquiry skills & Processes - carrying out simple investigations			1	11
		1(d)	Infer some uses of air pressure	1			
		1(j)	Investigate the ways in which we can extinguish different types of fires	1			
		4(a)(i)	State that air is a mixture of several gases	1			
		4(a)(ii)		1			
		4(b)		1			
		4(c)(i)	Demonstrate understanding of the different types of air pollution	1			
		4(c)(ii)	Identify and list different causes of air pollution		1		
		4(c)(iii)	Investigate measures to prevent air pollution		1		
		4(c)(iv)	infer the effects of air pollution on living things and the environment	1			
		4(d)		2			
		1(g)	Investigate the rusting of iron and communicate findings	1			

7	Materials in the Environment	5(a)	Relate the properties of materials to their common uses		4		11
		5(b)	Recognise that some materials are obtained naturally while others are man-made	4			
		5(c)(i)	Inquiry skills and Processes - Identifying similarities between objects, concepts or processes			1	
		5(c)(ii)	Inquiry skills and processes - giving a general explanation for what is observed			1	
8	The Earth, Moon and Sun in the solar system	8(a)	Recognise Earth as a planet, Sun as a star; identify the sun, the earth and the Moon in the solar system	1			17
		8(b)(i)	Recognise the regular movements of Earth; relate movement of the Sun and Earth to the meaning of the day and the year	2			
		8(b)(ii)			1		
		8(c)(i)	Identify the Earth, the Sun and the Moon in the solar system		2		
		8(c)(ii)	Explain how Earth's movement causes day and night		1		
		8(d)	Demonstrate understanding of the need to care for planet Earth.	2			
		9(b)	State what is global warming	1			
		9(c)	Relate human activities to global warming	2			
		9(d)	Demonstrate understanding of the effects of global warming on living things and the environment		2		
		9(e)	Relate a rise in the level of carbon dioxide to global warming		1		
9(f)	List measures to prevent global warming		2				
9	Ecosystems of forests and lagoons	1(c)	List measures to prevent beach erosion	1			3
		1(i)	Identify a terrestrial and a marine ecosystem		1		
		9(a)	Describe an ecosystem using a forest and a lagoon	1			
Total =				51	37	12	100
