

Lesson 16 & 17: Student's Worksheet

Introducing Percentages – Use in real life context

1. Observe and discuss the pictures below.

Answer the following questions:

- What is common in the pictures?
- What does the symbol '%' represent?

Points to remember:

- Percentage is denoted using the percent sign '%'.
 - Percent means 'per 100', it helps compare parts of a whole.
 - It is another way of writing fractions and decimals.
 - A percentage is equivalent to a fraction in which the denominator is 100 e.g. 80% is $\frac{80}{100}$.
- The advantage of using percentages is that it is easier to compare percentages than fractions.

Question 1

- (a) Represent the given percentages by colouring the corresponding number of squares on each 100- square grid.

Percentage	Representation	Fraction
5 %		$\frac{5}{100} = \frac{1}{20}$
20 %		
37 %		
55 %		

75 %		
90 %		

(b) Write down the corresponding fractions, reduced to its lowest terms, to the percentages given.

Question 2: Matching Pairs Game

- (i) Cut out the given cards and place them face down.
- (ii) Flip the cards and pair the fractions with their percentages equivalents

$$\frac{2}{25}$$

$$\frac{3}{25}$$

Question 3

Convert the following percentages into decimals.

- (a) 48%
- (b) 65%
- (c) 70%
- (d) 90%
- (e) 7%
- (f) 9%

Question 4

Convert the following decimal into percentages.

- (a) 0.08
- (b) 0.17
- (c) 0.56
- (d) 0.1
- (e) 0.5
- (f) 0.125
