

Lesson 18: Student's Worksheet

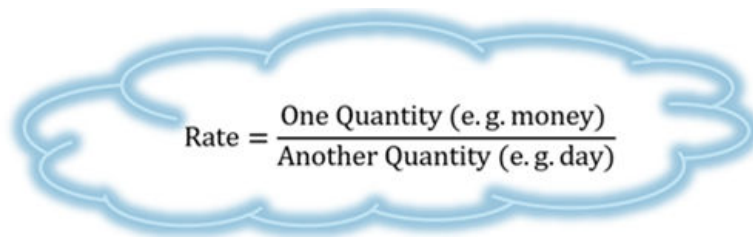

Introduction: Review Definition of Rate

1. Answer the following questions:

- How many words can you type in 1 minute?
- How much is a mason paid for a day of work?

Points to Remember:

- Rate is a comparison between two quantities having different units.
- We use the term 'per' to describe rate or denote rate by the symbol '/'.
• Formula for rate:

$$\text{Rate} = \frac{\text{One Quantity (e.g. money)}}{\text{Another Quantity (e.g. day)}}$$

Question 1

John can type 910 words in 7 minutes. What is his typing rate?

Question 2

A handy man is paid Rs 6975 for 9 hours of work. How much is he paid per hour?

Question 3

A driver travels a total distance of 400 km in his van in 5 hours. Calculate his speed in km/h.

Question 4

Carrots cost Rs 30/kg. What is the cost in cents/g? (**Remember: 1 kg = 1000 g and Rs 1 = 100 cents**)

Question 5

A motorcycle travels at a speed of 54km/h. What is its speed in m/s? (**Remember:**

1 km = 1000 m and 1 h = 3600 s)

Question 6

A water tank is being filled at a rate of 5 L/min. Find the rate in mL/h. **(Remember: 1 L = 1000 mL and 1 h = 60 min)**
