

Grade 8

Music and Entertainment

Listen to the  
instructions of your  
teacher carefully

We will use the concept of proportion to calculate the cost of different pencils.

You can use small sticks(toothpicks) to make bundles of 10.

Activity 1:

If you buy one pencil for Rs 10.

2 pencils will cost Rs.....

3 pencils will cost Rs.....

4 pencils will cost Rs.....

5 pencils will cost Rs.....

What do you observe about your answers?

Are the answers an example of the multiplication table 10?

The above activity is known as proportion.

Activity 2: Make the students calculate the number of rows in a bamboo flute pan

In a bamboo pan flute, there are 12 of bamboo

How many rows of bamboo will there be in?

2 bamboo pan flute.....

3 bamboo pan flute.....

4 bamboo pan flute.....

5 bamboo pan flute.....

6 bamboo pan flute.....

You are actually using multiples of 12 to calculate the number of bamboo pan flutes.
