

Activity : Which sports do you prefer?

Steps:

1. Ask students in your class which sports and games they like most.
2. Record their responses on the board in tabular form.
3. Demonstration - Use the data collected to draw a simple bar chart on the board using different colours for the different bars. Show how to label the axes and choose an appropriate scale.

Question 2:

The bar chart below shows the number of students participating in five different sports at a school in 2024.

The line graph shows the average number of hours per week students spent practicing each sport.

Question 1:

Using the data given in the table, draw a bar chart to show the number of students playing each sport

The table below shows the number of students who play different sports in a school:

Sport	Number of student
Football	20
cricket	35
Basketball	15
Badminton	25
Table Tennis	10

Based on the graphs, answer the following questions:

1. Which sport had the highest number of participants?
2. Which sport had the highest average practice time per week?
3. Calculate the total number of hours spent on practice for each sport by all participants.
4. Which sport had the **most overall time** spent in practice when combining number of participants and average hours?
5. What can you infer about the popularity and commitment levels for each sport?

Question 3:

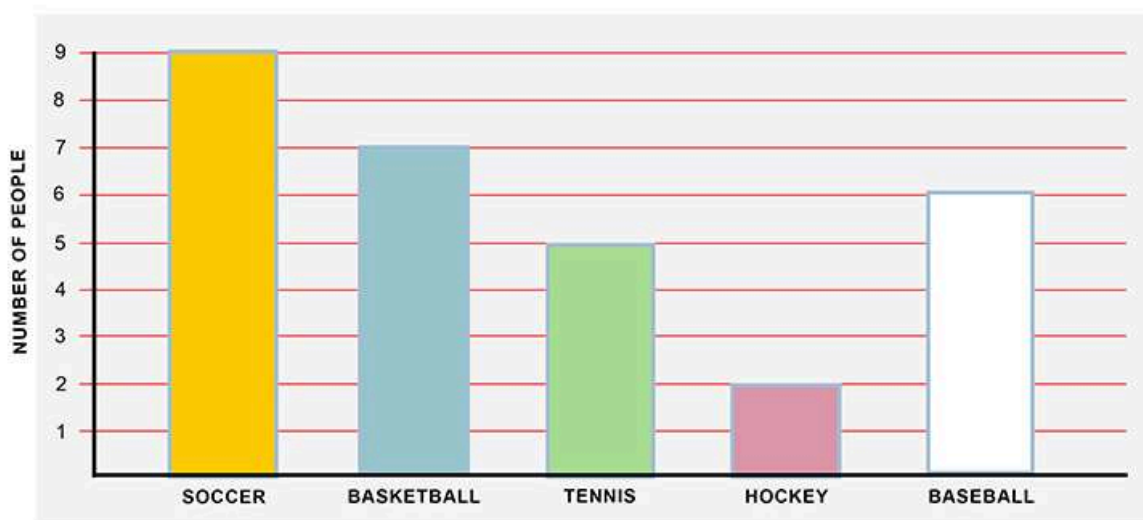

The table shows the sports practiced by students as a hobby:

Sports students	Football	Basketball	Volleyball	Tennis Table	Hand ball	Cricket	Hockey	Swimming
-----------------	----------	------------	------------	--------------	-----------	---------	--------	----------

practice regularly								
Number of students	5	6	2	1	8	4	9	5

Draw a line chart to represent the following information:

Question 4:

A Grade 8 class was asked about the sport they prefer. The results were recorded in the above bar chart.

Using the given information, draw a line chart to represent the preference of students for Soccer, basketball, tennis and hockey.
