

Shopping Corner (Addition): Grade 8

A. Title of card: Addition of numbers with carrying
B. Competency, Element and Performance Criteria: C 2.1: Use of numerical concepts in practical situations Element 2: Perform arithmetic operations/calculations in practical situations Performance Criteria: Addition of numbers - Level 2: Addition with Carrying in practical situations
C. Purpose of activity: This activity will develop students' ability to add numbers with carrying and enable them to apply this skill in real-life contexts
D. Learning Outcomes: By the end of the lesson, students should be able to - perform addition of numbers with carrying - apply the concept of addition with carrying in real-life scenarios
E. Resources and materials: - Supermarket brochures or items/pictures with price tags - Specimen Mauritian coins and notes 
F. Teaching trajectories/Implementation guidelines: Provide step-by-step examples of addition with carrying on the board before the activity. Lay emphasis on the concept of <i>place value</i> while performing the addition operation. Colour coding may be used to help students differentiate among different place values (e.g., Digits representing Units in green, Tens in blue and Hundreds in red). Activity: Calculating Total Sales in a Shop Steps: Set up a classroom 'shopping corner' with item pictures and its corresponding price tags.

2. Students pick one or more items with the given price tag(s) and use specimen coins/notes to pay the exact amount for the item(s).

3. Role play: Students act as shopkeepers and customers taking turns. A customer buys 2 or 3 items at a time and the shopkeeper calculates the total and gives change (if any). This process is repeated several times for consolidation of the concept.

Peer Assessment: Other students are asked to check the total payment for the items.

4. Students are given different combinations of notes and coins.

e.g. one 200-rupee note (Rs 200) + four 100-rupee notes (Rs 400) + three 50-rupee notes (Rs 150) + two 20-rupee coins (Rs 40) + six 10-rupee coins (Rs 60) = Rs 850.
Students must:

- i) Calculate their total money
- ii) Determine the maximum number of items they can buy. (They must provide different possible combinations of items)

5. Students can present their own shopping list to the class and find the total amount of money by explaining their answer.

G. Assessment

Question 1. Work out

(i) $185 + 97 =$ _____

(ii) $250 + 375 =$ _____

Question 2. Match the item bought to the correct total amount of money.

Items	Total
1 'Dholl puri' (Rs 25) + 1 'Roti' (Rs 18)	Rs 80
1 'Farata' (Rs 35 each) + 1 'Alouda' (Rs 45)	Rs 115
	Rs 43

Question 3. Complete the receipt below.

You buy **one** Smartwatch at Rs 2690, **one** Mobile phone at Rs 9490, **one** Screen Protector at Rs 250 and **two** Cover Case at Rs 595 each.

Receipt			
Receipt Number: <u>xxxxxxxx</u>			
Date: _____			
Customer Name: _____			
			
Item Description	Quantity	Unit Price	Total
PAYMENT ☐ CASH ☐ CREDIT CARD ☐ CHEQUE TOTAL:			

Question 4. Circle the correct answer.

- (a) Your electricity, water and internet bills are Rs 1875, Rs 450 and Rs 1479.
What is the total amount that you must pay for the bills?
- A. Rs 2325
- B. Rs 2804
- C. Rs 3804
- (b) You save Rs 1850 in January, Rs 2075 in February and Rs 1960 in March.
How much money did you save in all?
- A. Rs 5785
- B. Rs 5885
- C. Rs 5985

Question 5. Your budget for groceries is Rs 5000. You want to buy:

- Rice: Rs 1250 • Chicken: Rs 1875 • Vegetables: Rs 985 • Fish: Rs 1275

Do you have enough money to buy **all** the above? Give a reason for your answer.

A. Yes

B. No

Question 6.

How would you pay for each item with the least number of notes and coins?
One example has been done for you.

Question 7. Find the secret word.

Work out the addition. Find the corresponding letters.

Decode the word which is commonly used in football.

Addition Problems	Letter Code
Rs 127 + Rs 89 = _____	250 = O 106 = U
Rs 150 + Rs 75 = _____	162 = L 216 = G
Rs 63 + Rs 99 = _____	125 = E 225 = A
Rs 200 + Rs 50 = _____	152 = T

Secret Word: _____

H. Extension of activity

Discuss and solve problems involving both addition and subtraction (e.g., Total amount and Change received) related to shopping and other real-life contexts.
