

## Lesson 14 &amp; 15: Student's Worksheet

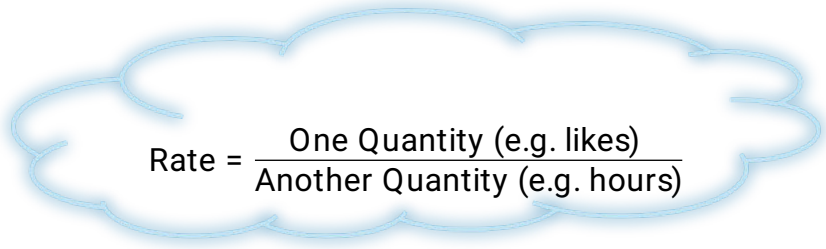

**Lesson 14****Introduction: Review Definition of Rate**

1. Answer the following questions:

- How many likes does a post get in an hour?
- How many followers does a celebrity gain per day?

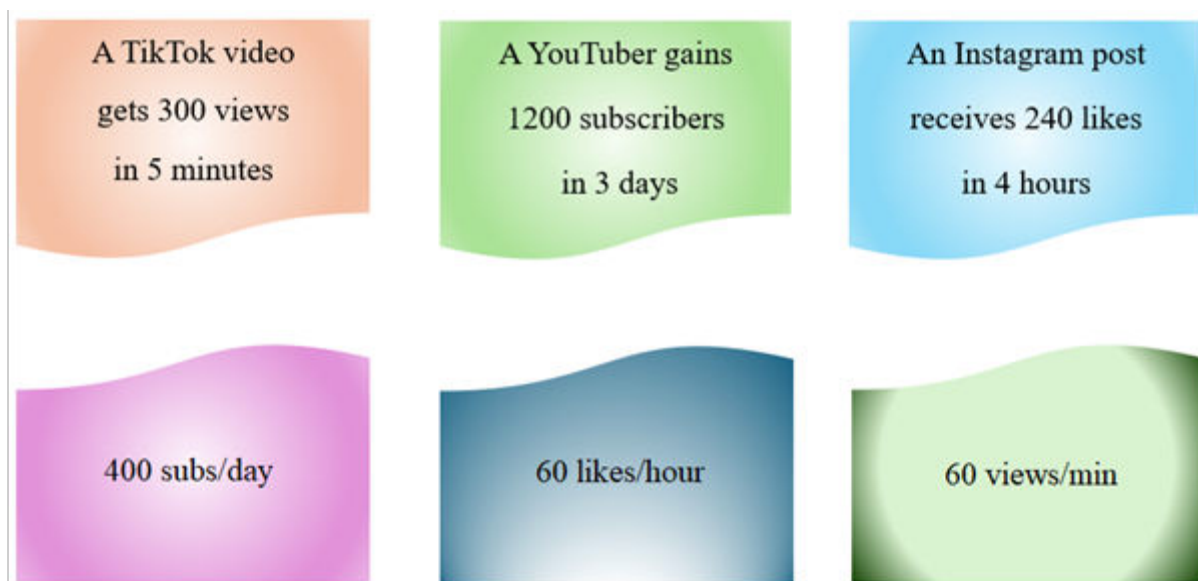

**Points to Remember:**

- Rate is a comparison between two quantities having different units.
- We use the term 'per' to describe rate or denote rate by the symbol '/'.  
• Formula for rate:

$$\text{Rate} = \frac{\text{One Quantity (e.g. likes)}}{\text{Another Quantity (e.g. hours)}}$$

**Question 1**

Match the given scenarios with their corresponding rate.

## Question 2

Choose the correct answer.

1. Jessica, a school typist types 225 words in 5 minutes. What is her typing rate?  
A. 40 words/min                      B. 41 words/min      C. 45 words/min
2. A worker is paid Rs 5820 for 6 hours of work. What is his rate of pay per hour?  
A. Rs 970/h                      B. Rs 1030/h              C. Rs 1350/h
3. A car travels a distance of 120 km using 8 litres of fuel. Calculate the rate at which the car consumes fuel.  
A. 10 km/L                      B. 12 km/L                      C. 15km/L
4. A Facebook page increases by 384 followers per day. What is the average rate of increase in followers per hour? (**Remember 1 day = 24 hours**)  
A. 8 followers/h                      B. 16 followers/h      C. 32 followers/h

5. A TikTok video is gets 420 likes in 1 hour. What is the average rate of likes per minute? **(Remember 1 hour = 60 minutes)**

- A. 7 likes/min                      B. 70 likes/min                      C. 25200 likes/min

## Lesson 15

### Question 3
