

Foundation Program in Literacy, Numeracy and Skills

NUMERACY

Teacher's Guide: GRADE 9 –Lesson 10

A. Recognise, name and decompose coins and notes up to Rs 1 000 000

B. Competency, Element and Performance Criteria:

C2.1 Use numerical concepts in practical situations

Element 1: Count, read and write numbers

Performance Criteria:

2.1.1B Compose and decompose numbers as related to the use of money

Range - Level 2: Units, tens, hundreds up to millions

C. Purpose of activity:

Learners will confidently identify Mauritian currency and practice composing and decomposing large sums using different combinations of coins and notes.

D. Learning Outcomes:

By the end of the lesson, students should be able to

- Recognise and name Mauritian coins and notes up to Rs 2,000.
- Compose and decompose amounts up to Rs 1,000,000 using different currency combinations.
- Apply mental math and problem- solving skills in real- world money scenarios.

E. Resources and materials:

- Play money (or printouts of Mauritian coins/notes: Rs 1, Rs 5, Rs 10, Rs 20, Rs 25, Rs 50, Rs 100, Rs 200, Rs 500, Rs 1,000, Rs 2,000)
- Flashcards with amounts written on them (e.g. Rs 75, Rs 1,000, Rs 10,500, Rs 100,000, Rs 1,000,000)
- Money chart for reference
- Envelopes or containers labeled with different note/coin values

F. Teaching trajectories/Implementation guidelines:

Activity 1: Currency Warm-Up Discussion

Think-Pair-Share

- Ask:
 - "When was the last time you used cash?"
 - "Which coin or note do you use the most?"
- Present a visual chart or real samples of Mauritian coins and notes:
Coins: Rs 1, Rs 5, Rs 10, Rs 20
Notes: Rs 25, Rs 50, Rs 100, Rs 200, Rs 500, Rs 1000, Rs 2000

- Discuss key features: colour, size, texture, images (e.g., Dodo, palm tree, historical figures), and materials (metal/paper/plastic).

Activity 2: Currency Gallery Walk

Setup: Post printed images or real money samples around the room.

Instructions:

- In pairs, students rotate around the room. At each station:
 - Identify the denomination
 - Write down a key feature (e.g., "This note is purple and has a portrait of Sir Seewoosagur Ramgoolam.")
 - Note whether it's a coin or a note

Activity 3: Currency Sorting & Classification

Hands-on Group Sorting

- Groups receive a **set of cut-out currency images** (or tokens with Rs values).
- Tasks:
 1. Sort into **coins vs notes**
 2. Arrange in **ascending and descending order**
 3. Classify by features (colour, shape, material)
 4. Identify **which coins/notes can buy a given item** (e.g., bus ticket, loaf of bread)

Extension: Ask students to calculate total value from a mix (e.g., Rs 5 coin + Rs 200 note

+ Rs 50 note =?)

Foundation Program in Literacy, Numeracy and Skills

NUMERACY

Teacher's Guide: GRADE 9 –Lesson 11

Guided Activity 4: Decomposing Amounts

- Show how to decompose amounts using combinations of notes/coins.
 - Example: Rs 750 = Rs 500 + Rs 200 + Rs 50
 - Rs 3,250 = Rs 2,000 + Rs 1,000 + Rs 200 + Rs 50
- Write amounts on the board and do live decomposition with student responses.

Hands-On Activity 5: Group Work

Activity Title: "Build the Amount!"

- Divide class into small groups.
- Each group receives:
 - Play money (replica coins and notes)
 - Task cards with amounts (e.g., Rs 11,000; Rs 253,500; Rs 999,999)
- Groups decompose each amount using the play money.
- Encourage **multiple decompositions** (e.g., Rs 1,000 = $5 \times \text{Rs } 200$ or $10 \times \text{Rs } 100$)
- Monitor and guide each group.
