

**MINISTRY OF EDUCATION AND
HUMAN RESOURCE**

END OF YEAR ASSESSMENT 2025

Name:.....

**SCIENCE
GRADE 5**

TIME: 1 hour

Instructions to candidates

1. Write your name in the space provided.
2. Check that this assessment booklet contains 6 questions, printed on 11 pages, numbered 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, and 12.
3. If there are blank pages or pages missing, you should inform the invigilator immediately.
4. You should **not** use red ink in answering questions.
5. Write all your answers clearly in the assessment booklet.
6. Attempt all questions.
7. The total marks for this paper is 50.

Question 1 (5 marks)

Circle the correct answer. Each item carries one mark.

1. **Diagram 1** shows a plant.

What is the function of the **leaf** in the plant?

- A** It absorbs water from the soil.
- B** It protects the seed.
- C** It holds the plant firmly in the soil.
- D** It makes food for the plant.

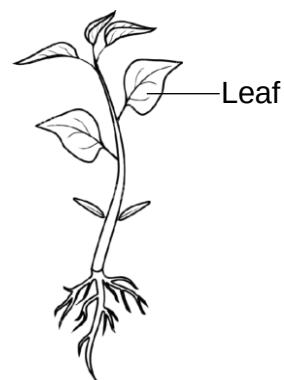

Diagram 1: A plant

2. **Diagram 2** shows a thermometer.

What is the **red liquid** found in the bulb of the thermometer?

- A** Alcohol
- B** Mercury
- C** Oil
- D** Water

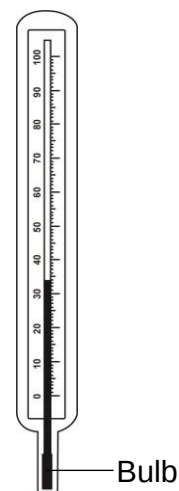

Diagram 2: A thermometer

3. **Diagram 3** shows an electrical wire. Part **X** is the outer part of the wire. What material is used to make part **X**?

- A Copper
- B Wool
- C Iron
- D Rubber

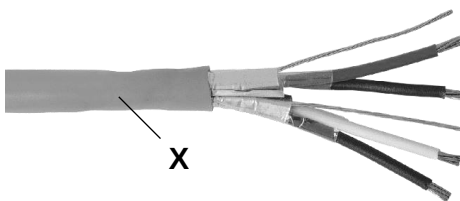

Diagram 3: An electric wire

4. Which of the following is a bird **endemic** to the Island of Mauritius?

A Crow

B Cardinal Jaune

C Echo Parakeet

D Sparrow

5. What happens during **pollination**?

- A Transfer of a seed to the soil
- B Transfer of pollen from the male part to the female part of a flower
- C Transfer of pollen from the female part to the male part of a flower
- D Transfer of water from the roots to the leaves

Question 2 (8 marks)

(a) Match each picture in **Column A** to the source of energy it uses in **Column B**.

Column A

Sailing boat

Motorcycle

Drying of octopus

Column B

● Sun

● Petrol

● Water

● Wind

[3]

(b) Name one fuel used in thermal power stations to produce electricity.

..... [1]

- (c) **Diagram 4** shows a house with solar panels on the roof.

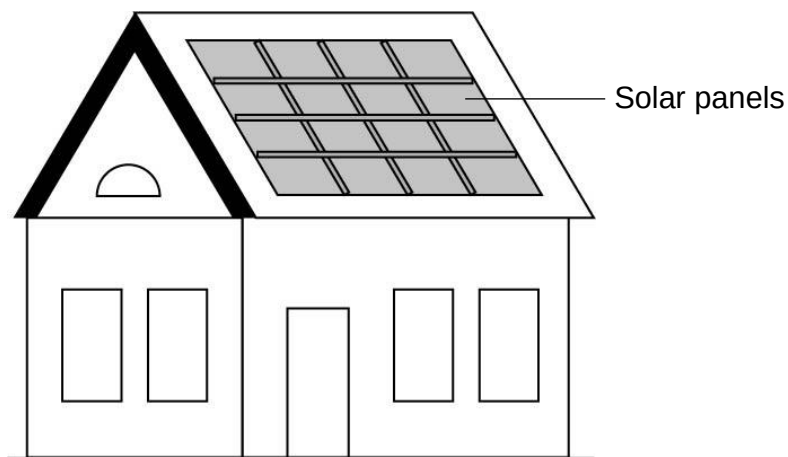

Diagram 4: A house with solar panels on the roof

- (i) Which form of energy from the sun is used in solar panels?

..... [1]

- (ii) Why is using solar panels better than using fossil fuels for producing electricity?

..... [1]

- (d) Give two ways how we can save electricity at home.

1. [1]

2. [1]

Question 3 (9 marks)

Diagram 5 shows a glass of water containing some ice cubes.

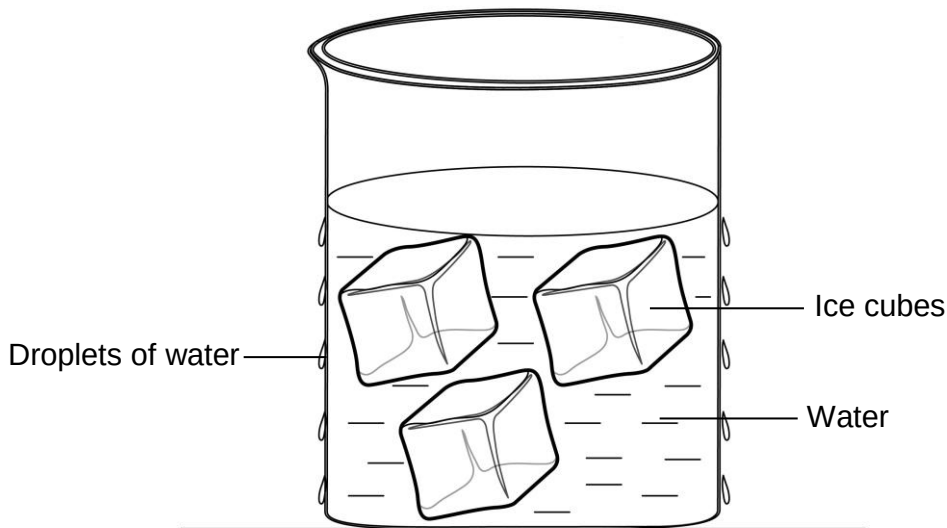

Diagram 5: Glass of water containing ice cubes

- (a) Put a tick (✓) in the boxes next to the correct answers to indicate the changes which occur in the glass after some time.

	Change after some time			
The ice cubes	melt	☐	freeze	☐
The water becomes	warm	☐	cold	☐
The temperature of the water	rises	☐	falls	☐

[3]

(b) Droplets of water are formed on the outer surface of the glass.

(i) By which process are the droplets of water formed?

.....

[1]

(ii) Describe the process you mentioned in **(b)(i)**.

.....

..... [2]

(c) (i) Give one **property** of ice that makes it useful for skiing or skating.

..... [1]

(ii) Give two uses of ice, other than skiing and skating.

1. [1]

2. [1]

Question 4 (9 marks)

A pupil sets up a simple electric circuit as shown in **Diagram 6**.

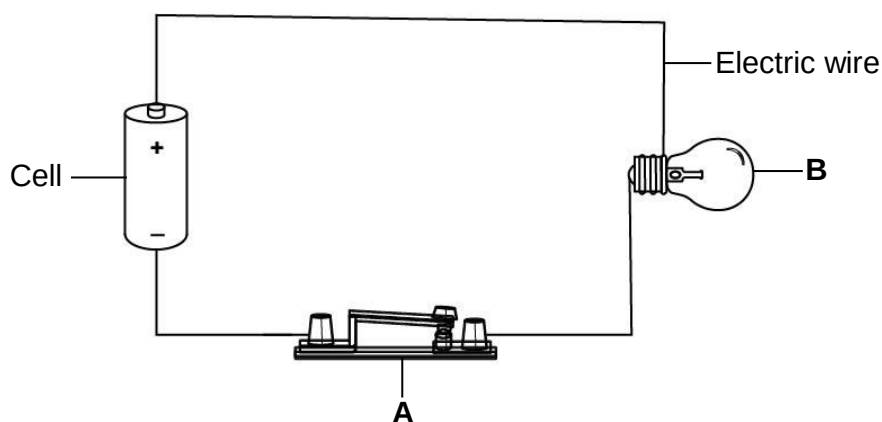

Diagram 6: A simple electric circuit

- (a) (i) Name the two components labelled **A** and **B** in **Diagram 6**.

A

B

[2]

- (ii) What is the **source** of energy of the electric circuit shown in **Diagram 6**?

..... [1]

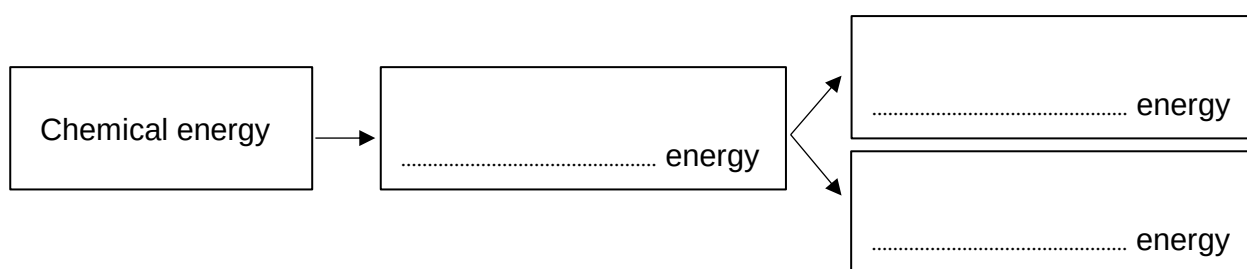

- (iii) What is the function of the electric wire in the electric circuit?

..... [1]

- (b) The electric circuit shown in **Diagram 6** is a closed circuit.
What is a closed circuit?

..... [1]

- (c) Complete the diagram below to show the transformation of energy occurring in the electric circuit in **Diagram 6**.

[3]

- (d) After some time, the pupil finds that the bulb has stopped lighting up.
Suggest one reason why the bulb stopped lighting up.

..... [1]

Question 5 (8 marks)

Diagram 7 shows soil erosion.

Diagram 7: Soil erosion

- (a) Give two human activities that cause soil erosion.

1.

2. [2]

- (b) Flooding may occur as a result of soil erosion.
Explain how soil erosion can cause flooding.

.....

..... [2]

- (c) Give two measures taken to prevent soil erosion on slopes of hills.

1.

2. [2]

- (d) Give two ways how dense forests prevent soil erosion.

1.

2. [2]

Question 6 (11 marks)

- (a) Some plants and animals have common habitats.

Complete the table given below by choosing the appropriate words from the following list:

bulrush ~~seaweeds~~ cactus dog
 camel frog octopus papaya

Habitat	Plant	Animal
Sea	seaweeds	
Wetland		
Desert		

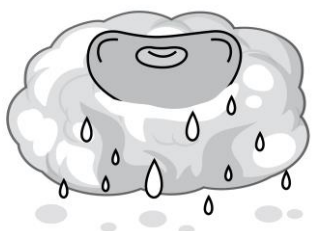

[5]

- (b) Ryan investigates the germination of two seeds, at room temperature.

He uses two similar seeds, seed **A** and seed **B**.

Seed **A** is placed in a cotton wool soaked in water.

Seed **B** is placed in a dry cotton wool.

Seed **A** in cotton wool soaked in water

Seed **B** in dry cotton wool

Diagram 8: Seed A and Seed B

- (i) Which seed is likely to germinate?

..... [1]

- (ii) Explain your answer in **(b)(i)**.

.....

..... [1]

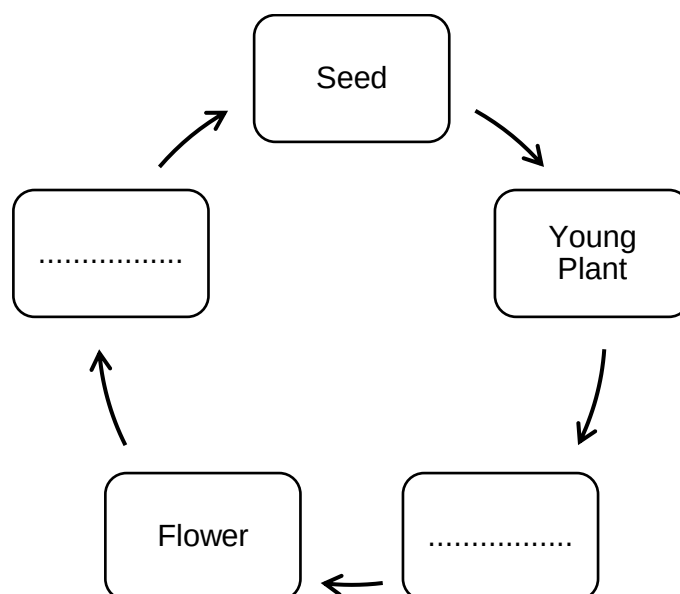

(iii) What will appear **first** during germination?

..... [1]

(iv) As the seed germinates, it becomes smaller.
Explain why.

..... [1]

(c) Complete the life cycle of a flowering plant by writing the missing stages in **Diagram 9**.

[2]

Diagram 9: Life cycle of flowering plant
